

DATA SCIENCE FASTTRACK TESTIMONIALS

Hear what our previous students have to say about their Codevita Live journey!

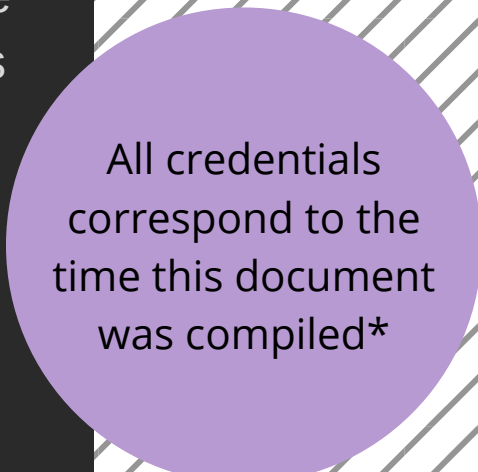

The course pedagogy is just about perfect. The theme behind the modules , capstone projects and checkpoint exam is refreshing.

- **Anuja Saraogi, Senior Software Engineer, Ellie Mae**

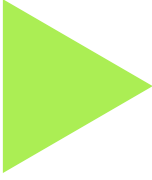

Never thought learning data-wrangling(which is regarded as one of the most dreaded topics in data science) would be so much fun .Great work by the Codevita Live team! Almost felt that I was reading a comic .

-**Parth Verma,Student,9th Grade,Kendriya Vidyalaya**

All credentials correspond to the time this document was compiled*

I personally found the course to be pretty extensive and fun at the same time. The fact that they have compiled a general curriculum that can cater to the needs of future data scientists, analysts and ML engineers alike is extremely impressive. Codevita Live's commitment towards its student base is impeccable and that is what makes this experience all the more enriching.

-Naman Shah, Student, 3rd Year, Amity University Mumbai

More than the things I have learnt, the projects that I completed and the impact that this will have on my career, what I loved the most about this programme is the grind. Multiple weeks of normal coursework along with 2 sidetracks just to get hands on your data science e-degree. Whew! Extremely grateful to the Codevita Live team and I hope that they keep training students the way they do.

-Ayushi Saraogi, DC Analyst, Delloite
